WORKSHOP – AUTOMATED TESTING WITH SELENIDE

Hypothesis

- Selenide is a wonderful tool
- 

Testing web applications

- Direct API testing
 - VS
 - Webinterface designed for testing (codeborne)
- 

Selenide = a better Selenium

- Ajax support
 - Dynamic content
 - Stable
 - Readable
 - Short expression->

 - Very little doc
- 

1 example

- Selenium
- `getElements($By.className("gwt-ListBox"), 4).sendKeys("Tere");`
- Selenide
- `$(By.className("gwt-ListBox"), 4).sendKeys("Tere");`

Java + Selenide + Selenium WebDriver

Using Selenium:

- Find the element. do something with it
- `$("#content").shouldHave(text("Dogs"));`
- `$("#fieldset").shouldNotHave(text("Cats"));`
- `$("#fieldset", 1).shouldHave(text("Cows"));`
- `$(By.PartialLinkText("Logout")).click();`
- `$(By.linkText("Yes")).click();`

Lets get dirty...

- Code...
- 

The end.

- Thank you!
-
